SAFGA Members,

Dear Members,

There have been some concerns in regard to a communication from Darian Stringer regarding the draft firearms act; I have spoken to Darian regarding this.

It would appear that at a previous round table discussion it was suggested that lever action shotguns should be completely banned, in response Darian proposed as a worst case outcome that they be classed as either class "C" or "D"

Obviously we, SAFGA, will be promoting that the current category "A" should be maintained, as there appears to be no evidence that lever action shotguns are inherently more dangerous, thus requiring a reclassification

I have also written to Darian requesting him to write to the Minister Piccolo informing him that section seven of his responses to the draft firearms act are not the views held by SAFGA and were in no way authorized by State Council nor the executive.

Bryan M Stokes

President
